

Greenex™ Algicide

For Algae Controlling Agent

Greenex™ is an algae controlling agent based on natural mineral compound. The product is highly capable for reducing and preventing algae, including filamentous and higher algae. As the product may be applied to the water manually and at a low dosage (1 part per 2000 to 8000 as general recommendation), cost in dealing with algae problem is minimized.

Benefits

- ✓ **Effective on a wide range of algae and parasite**
- ✓ **Conveniently simple application ,saving energy**
- ✓ **Low dosage, cost effective**
- ✓ **No ingredient is listed as or suspected carcinogen**

Direction to use

For routine application: use the suggested monthly dosage of 1 part product to 8000 parts water to calculate the required amount of the product.

For shock dosage: the recommendation is 1 part product to 2000 parts water.

The product should be applied evenly throughout the entire water surface.

For best result, some preliminary water testing may be carried out to find the most efficient dosage.
