Applications	Rust Preventive
Customer /Location	BPP/Bangkok, Thailand
Previous Lube/Fluids	N/A
Materials	Steel...
Process/Machines	stamping machine
Customer Requirements	Quality Improvement (Rust Protection)

Issue/Problems:

- The customer was looking for a product that could provide rust protection for steel stamping for up to 6 months.

Solutions:

- We introduced Lube-Kote 15 to our customers for part protection. Because it has a good rust coating film and can prevent rust for a long time and recommends correct use to prevent rust.

1. Tank number 1 should drain all Lube-Kote 15 after immersing every 24,000 pieces or every 5 days.

2. Approximately 100-150 ml of oil should be drained every day before starting work to maintain oil quality and prevent rust.

3. The workpiece should be dipped in rust-preventive oil once to clean dirt and once to coat the rust-preventive oil on the workpiece.

Summary: After customers have used Lube-Kote 15 for more than 2 years, customers are more satisfied with our product because it can help prevent rust and solve rust problems very well.
